BFS algorithm

This is `print("Hello world")` inline code.

- $f(\textit{startVertex}) = T$
- $level = 1$ to $n - 1$
 - $s\langle f \rangle = level$
 - $f\langle \neg s, r \rangle = fA$

Some code

```
1 if (true) {
2   GrB_mxm(&frontier, numsp, GrB_NULL, Int32AddMul, A, frontier,
3   desc_tsr);
4 } else {
5   // never happens
6 }
```
